Purchase Value: >\$1,000,000

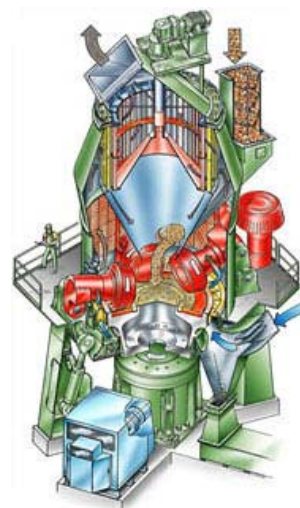

REFERENCE

Project Description

For over 100 years Loesche has been pioneering new technologies in the Cement and Grinder Mill industry. Loesche has nine subsidiaries in eight different countries and employs over 500 people. In addition to manufacturing state-of-the-art mills, Loesche also provides a wide range of services including custom installations, on-site engineering, and repair or upgrades to existing plants.

Loesche roller grinding mills are applied with great success to the most varied raw materials. These include:

- Cement raw materials, Cement Clinker, Cement blends, Porcelain, Limestone, Burnt lime and Blast Furnace Slag,
- Hard Coal, Brown Coal, Lignite, Anthracite, Petroleum and other Coke types,
- Phosphate, Feldspar, Talcum, Clay, Kaolin, Bentonite, Barite, Graphite, Colemanite, Titanium Dioxide, Titanium Slag, Minerals and Ores.

Loesche roller grinding mills are the most efficient mills in the world and achieve very high throughputs. They are also extremely maintenance friendly. Service tasks can be carried out quickly. Downtimes are therefore reduced to a minimum.

INP Services
