REFERENCE

Project Description

Rotorion GmbH, a Tognum Group company, Germany, is one of the leading European specialists in its field. They develop, produce and sell about one million propeller shafts every year for passenger cars and light commercial vehicles. Rotorian's products are made from high-quality components, crafted to harmonize with the drive systems of different types of vehicle, and tested for reliable performance. In sum, the Propeller Shaft product division offers premium-quality, made-to-measure solutions - at a compelling price.

INP Services

- Production line maintenance
- Installation and commissioning of a camera control system and integration into the main S7 control system
- Production line optimization of S7 control program
